HOEFLON C10

Lift 4000 kg in the Netherlands without a crane permit. You can with our C10 compact crane, making it the perfect choice for heavier work in industry and steel erection. Even at a hoisting height of 21 m this crane still has an enormous hoisting capacity of 750 kg. The C10 compact crane has three speeds, making it exceptionally manoeuvrable. The removable ballast and the easily detachable options make it possible to quickly reduce the total weight of the crane. Simply put, this is a machine with many possibilities.
